

International Construction and Utility Equipment Exposition

Dave Hughes

ICUEE, the International Construction and Utility Equipment Exposition has named Dave Hughes, vice president of global sales for McElroy Manufacturing, Inc., as its 2021 show chair. He will be leading the ICUEE management committee, a volunteer group of utility construction industry executives for overall show planning.

The biennial show last took place in 2019 and is set to reopen September 28-30, 2021. ICUEE is known for its numerous interactive product demonstrations taking place over the three-day event.

"AEM (Association of Equipment Manufacturers) is more than pleased to have Dave onboard as the new chair for ICUEE 2021. His expertise and participation will be incredibly valuable to our team as we continue to work towards our goals for 2021. We know that Dave and the rest of our management committee all have a great vision of what ICUEE can and will be, and we look forward to announcing some exciting changes in the coming year," said ICUEE Show Director John Rozum.

Serving as vice chair of the ICUEE 2021 Management Committee is Julie Fuller, vice president of engineering, marketing, and purchasing for Tadano Mantis Corporation.

Here is the full roster of the ICUEE 2021 Management Committee:

- Chris Braehler - president and CEO, TT Technologies Inc.
- Joe Caywood - director of marketing & product management, Terex Corporation
- Andrew Christopher - director, corporate business division, John Deere Construction & Forestry

Deep Foundations Institute (DFI)

Peter Faust

DFI's membership voted to elect two new members to the DFI Board of Trustees and reelected three members. The newly elected trustees are Peter Faust of Malcolm Drilling, and Franz-Werner Gerressen of Bauer Maschinen.

Faust, vice president of business development at Malcolm Drilling Company, has over 25 years of professional experience in the design and construction of foundations. After being involved in project management and engineering of large, complex infrastructure projects in Asia and Europe, he joined Malcolm in 2006. He has been involved in the design and construction of numerous foundation projects throughout the entire U.S. He also serves on DFI's Drilled Shaft and Auger Cast-In-Place Pile and Drilled Displacement Pile Committees.

Gerressen, director of the Construction Methods Development Department at Bauer Maschinen, joined the company in 1992. He has held numerous positions including head of both the CSV-Soil Stabilization Department and Soil Improvement Department, head of the Diaphragm/Cut-off Walls Specialist Department, and head of the testing laboratory for building materials. He also serves as the trustee liaison for DFI's Soil Mixing Committee.

The three reelected offices are David Paul, P.E., Paul Geotek Engineering; Howard Perko, Ph.D., P.E., Magnum Piering; and Lori Simpson, P.E., G.E., Langan.

The current officers of the DFI Board of Trustees for 2020-2021 are:

- President - Matthew Janes, M.B.A., P.Eng. - Isherwood Associates
- Vice President - Michael H. Wysocky, Ph.D., P.E. - Thatcher Engineering
- Treasurer - Gianfranco Di Cicco - Bauer Foundation
- Secretary - James O. Johnson - Condon-Johnson & Associates

Herrenknecht

Jack Brockway, president of Herrenknecht Tunnelling Systems USA, has been awarded the prestigious Golden Beaver Award 2020, by "The Beavers", an association founded in 1955. The award is presented to those who have made outstanding contributions to the U.S. building and civil engineering industry.

The association of leading representatives of the U.S. construction industry honored his achievements in outstanding projects and technological advances in mechanized tunnelling with the Service & Supply Award. "His motto is: American ingenuity combined with German engineering." It was with these words, Jack Brockway was introduced as one of the four prize winners.

"I am quite proud to have been nominated for a Golden Beaver Award. I did not expect that," Jack Brockway stated happily. He used his platform at the award ceremony to encourage young professionals to embark on a career in tunnelling: "Tunnelling gets into your blood. Building fascinating infrastructure projects is a first-class career opportunity for young engineers. Especially since it is not only engineering expertise but also a good hands-on feeling that counts."

The other winners were Timothy Barnard, chairman of Barnard Construction Company, Inc., in the Management category; Clayton Gilliland, senior vice president and area manager of Stacy and Witbeck, Inc. in the Supervision category; and Daniel N. Adams, president and CEO of McMillen Jacobs Associates in the Engineering category.

Jack accepted the award from Dave J. Miles, president of The Beavers.
